About me

Informatics engineer and Data Science Master's student, currently writing a scientific article on cloud resource consumption prediction. At Sabre, I gained experience in large-scale cloud systems and strengthened skills essential for data science—attention to detail, analytical thinking, and validation. Skilled in Python, end-to-end data workflows, and machine learning applications, I'm eager to apply my skills to meaningful, data-centric work.

Areas of specialization

Time Series Forecasting • ML Pipeline Orchestration • Image Processing • Model Validation • Software quality

Languages

Polish | native
English | C1

Personal Info

Location: Trzebinia, Poland
Driving licence: Category B

Interests

Science fiction • Strategic games • Geopolitics • Astrophysics • 20th-century history • Piano playing • Ballroom dance (Class B)

EDUCATION

02/2024–Current	Master of Engineering COMPUTER SCIENCE – DATA SCIENCE • AGH University of Krakow , Faculty of Computer Science  Thesis: Short- and long-term prediction of cloud resource consumption using deep learning.
10/2020–01/2024	Engineer COMPUTER SCIENCE • Silesian University of Technology , Faculty of Automatic Control, Electronics and Computer Science  Thesis: An application supporting the analysis of the corneal endothelium. Final grade: 5, awarded the Rector's Scholarship for academic excellence.
09/2016–06/2020	Technician COMPUTER SCIENCE • Technikum w Zespole Szkół Techniczno-Usługowych  • Trzebinia 

WORK EXPERIENCE

07/2024–05/2025	Software Quality Engineer SABRE POLAND  • Cracow  <i>Java, Cucumber, Selenium WebDriver, TestNG, Git, Jenkins, Docker</i> Designed and maintained automated acceptance tests in a large-scale monorepo; analyzed regression results to identify issues and verify new features.
09/2022	Full-stack Developer PROINTEGRA  • Katowice  <i>C#, ASP.NET Core, Angular, TypeScript, Entity Framework, SQL Server, Azure DevOps</i> Identified and resolved software bugs; wrote unit tests to ensure reliability of a web application.
10/2020	IT Technician TAURON WYTWARZANIE S.A.  • Trzebinia  <i>Siemens Step 7, TIA Portal, SCADA (WinCC), Windows Server, Active Directory, Bash</i> Programmed industrial controllers used in power plant automation systems; provided remote IT support and troubleshooting for internal users.

TECHNOLOGIES

- Python, C/C++
- Docker, Linux, Git
- Machine Learning (scikit-learn, PyTorch)
- ZenML, MLflow
- AWS, GCP
- Java, TypeScript

MEMBERSHIPS

- 04/2024–Current** SatLab AGH student science club
- 03/2024–Current** Transpeed AGH student science club
- 02/2017–05/2017** Volunteer at DKMS.

PROJECTS

01/2024	corneal-endothelium-analEYEzer - a microservice-based system using Next.js, DRF, Celery, and RabbitMQ, integrated with MinIO for image storage and a SQL database for metadata. The system allows users to upload corneal endothelium images and supports asynchronous processing and analysis of medical parameters.
07/2023	MediMoveApp - a web application written in C# that enables the management and tracking of sanitary transport services.
